omnigo | ITI SOFTWARE SYSTEM OPTIONS

omnigo | MODULAR SOFTWARE SOLUTION

Omnigo's modular approach to software development and deployment allows our customers to continually customize their system's capability by selecting components to meet changes in their business. The core system, an economical entry point with commonly used functionality, is easily expanded through add-on modules, partner integrations, and activation of advanced features within the app.

omnigo | ITI CORE

FEATURES INCLUDED IN ITI CORE SOFTWARE

ALERTS	Configurable warning messages to be displayed when encounter a specific person, vehicle, or location.
BOLOS	Send BOLO's to an individual, group, or across the organization.
CHAT	Send direct chat messages along with attachments between department personnel and agencies.
CONTACT / BUSINESS DIRECTORY	Central repository for information about contacts and businesses including alarm response, floorplans, and hazardous materials storage.
DESKTOP	Track ongoing activities between shifts by posting messages along with attachments.
EMAIL	Internal email system to send messages from one user to another.
NOTIFICATIONS	Notifications sent to individuals or groups based on supplied criteria.
PERSONNEL MANAGEMENT	Track employee information including contact information, rank, special skills, training certificates, and employment history.
QUERY REPORT WRITER	Create reports based on any available data in the CAD, Records Management, or Jail Management systems and allow export to other formats.
REGIONAL DATA SHARING	Search other Omnigo systems in your area for persons, vehicles, places, or property and view information from those reports.

omnigo | ITI CORE

FEATURES INCLUDED IN ITI CORE - COMPUTER-AIDED DISPATCH

ACTIVITY LOG	Track all CAD data that has occurred including dispatch of units on events, meal breaks, notes, etc.
ADMIN ENTRIES	Track non-event data such as meal breaks or officer in court by individual or unit.
ADDRESS HISTORY	Full address history of events that have occurred at the current event location.
ALERTS	Alerts to inform the dispatcher and officer, such as Warrant Alerts, on configured persons, vehicles, or locations.
CALL OUT EVENTS	Specific event types for major events that may require a SWAT team or other special type of responding unit.
CATEGORY NOTES	Configurable category notes on how a response should be handled such as questions that should be asked, based on the specific category type.
COMMAND LINE	Dispatch functions that can be configured to be performed by direct entry into the command line.
CONFIGURABLE FORMS	Modify the CAD event data entry form including adding or removing fields on the form or changing the order.
DISPATCH MONITORING	Web based monitoring of all dispatch activities (events, unit status, and logs) fully searchable and usable on phone, tablet, or desktop.
E911	Interface monitors incoming 911 calls through the department's phone equipment and automatically inserts the available details into the CAD event.

omnigo | ITI CORE

FEATURES INCLUDED IN ITI CORE - COMPUTER-AIDED DISPATCH

MERGE EVENTS	Merge two or more CAD events together bringing in the persons, vehicles, and log records from each event.
MULTI MONITORS	Support for an unlimited number of monitors to place content on the configured screen desired.
PASS DOWN LOG	Dispatcher's log of information to be passed down between shifts.
PHONE LIST	Phone list for contacts specific to CAD.
QUICK EVENTS	Configure a CAD command to automatically populate certain fields on the CAD event when it is used to speed up the data entry process.
RESPONSE PLANS	Advanced response plans configurable to the desired category of event with pre-determined criteria such as specific units from specific locations to respond.
SCHEDULED EVENTS	Schedule future events that will display automatically at a configured time, or on a recurring basis.
TESTING AND TRAINING ENVIRONMENTS	Built-in modes to try out new configurations before they are made live and for training new dispatchers without adding new 'real' events to the system.
TOW ROTATION	The ability to configure tow companies and provide both a rotation and days and times specific companies are available.
TRIGGERED NOTIFICATIONS	Automatically send CAD data to a 3rd party based on pre-determined criteria.

omnigo | ITI CORE

FEATURES INCLUDED IN ITI CORE - COMPUTER-AIDED DISPATCH

UNIT RECOMMENDATIONS	Basic unit recommendation based on available units and configured response needed for number of units and type.
UNIT REMINDERS	Reminders for dispatcher checks-in on units based on event category, last contact with officer, or total time based on the units status.
VALIDATION	Configurable validation ensuring required data is entered properly, such as the category/sub category type and address.
VIEW BASED DISPATCHING	Configure which dispatchers are responsible for events in various regions so that only those events show up for them by default.

omnigo | ITI CORE

FEATURES INCLUDED IN ITI CORE - RECORDS MANAGEMENT (WEB)

ACCIDENT	Data entry required for an accident report including all relevant parties and vehicles, accident diagram, and printed/electronic report.
CASE MANAGEMENT	Investigators can track their cases and activities during investigations including next investigation steps, time spent, reminders.
DAILY REPORTING	Fully configurable ability to track officers' daily activities such as number of stops and citations written.
EVIDENCE	Secure collection, storage, transfer, and disposal of evidence with full audit trail.
FIELD INTERVIEW	Track all field interviews conducted as a result of a stop
FORM CONFIGURATION	Modify data entry forms including adding, removing, renaming, changing order of fields based on the specific departments operation.
NIBRS	Collect all required NIBRS data for submission to the state.
OFFENSE / INCIDENT	Collect data needed to complete and O/I report including all relevant persons, vehicles, locations, suspects, arrestees, charges, narrative, etc.
PROBATION / PEOPLE	Track persons on probation/parole, charges, last contact date, next contact date.
RACIAL PROFILING	Enable officers to enter any required racial profiling data during a stop.

FEATURES INCLUDED IN ITI CORE - RECORDS MANAGEMENT (WEB)

SUMMONS	Officers can enter required citation or warning data based on the result of a stop and print a ticket.
USE OF FORCE	Officers can enter use of force data if any required tracking is required as part of an Offense/Incident.
VALIDATION	Configure validations throughout the system based on how the department operates.

omnigo | ITI CORE

FEATURES INCLUDED IN ITI CORE - JAIL MANAGEMENT

BANK	Track inmate bank accounts.
CELL ASSIGNMENT	Track current inmates cell, available cells, movement to another cell.
COMMISSARY	Track inmate commissary.
DIETS	Track inmate dietary restrictions.
E-SIGNATURE	Collect E-Signatures for operations such as in-take and return of inmate property.
EXPENSE TRACKING	Track inmate expenses, such as room and board, with the ability to configure defaults based on whom the inmate is being held (federal, state, local).
GANG ALERTS	Alert system user when attempting to assign an inmate to a cell with a gang affiliation that may cause a dangerous situation.
INCIDENTS	Track any inmate incidents that may occur between inmates or with staff.
INMATE BOOKING	Collect required information when booking inmates using an electronic form.
MEDICAL TRACKING	Track inmate medical information as well as the dispensing of medication.
RESTRICTIONS	Track current inmate restrictions.
VISITOR TRACKING	Track visits to an inmate including historical tracking, collection of ID, and NCIC runs.

omnigo | ITI ADD-ONS

POPULAR ADD-ON FUNCTIONALITY

ASSET/FLEET MANAGEMENT	Assign and track assets and vehicles.
CIVIL PROCESS	Track civil paper services (Divorce Papers, Court Orders).
CODE ENFORCEMENT	Create inspection forms for property, write tickets for violations, and more.
COMMAND AND PLANNING	Coordinate resources around planned events or incident response using centralized pre-plans and real-time command capabilities.
COURT ADMINISTRATION	Track municipal court cases including collection and distribution of fees to funds.
DIGITAL EVIDENCE MANAGEMENT	Capture, store, manage, submit to court, and dispose of digital evidence.
DUTY ROSTER	Schedule personnel and define shifts.
FIREARM PERMITS	Track firearm permits including type of firearm, serial number, location, and date of trained personnel.
INVESTIGATION MANAGEMENT	Central point for managing and reporting on all aspects of an investigation including evidence, notes, tasks, audio recordings, and correspondence.
LICENSE AND REGISTRATION	Create and customize license forms.

omnigo | ITI ADD-ONS

POPULAR ADD-ON FUNCTIONALITY

MAP AVL	Support for AVL vehicle tracking on the map.
MAP ESRI MAPS	Track CAD events, unit locations, heat map, and reporting, with any desired added ESRI layers from the department.
MAP GOOGLE MAPS	Track CAD events, unit locations, heat map, and reporting based with Google Maps provided layers.
MAP PROXIMITY BASED DISPATCHING	Determine available units closest to respond based on time calculated to reach the event location.
MOBILE PATROL	Track and interact with live CAD events via Mobile Data Terminal (MDT).
NCIC	Perform inquiries against NCIC for Wants / Warrants, DOR, Stolen Vehicle, and Property.
POLICY MANUAL	Create department policies, track versioning, and access.

omnigo | ITI INTEGRATIONS

POPULAR INTEGRATIONS - COMPUTER-AIDED DISPATCH
