GUARD TOUR

SECURITY GUARD PATROL SYSTEM

SECURITY GUARD SOFTWARE FOR CREATING, SCHEDULING & AUTOMATING GUARD TOURS

Our proof-of-presence security guard patrol system ensures safety and compliance throughout your properties by automating the execution and verification of scheduled and unscheduled tours.

VERIFIED CHECK-IN

EASILY RECORD, CREATE AND SCHEDULE GUARD TOURS

Dropdown lists and drag-and-drop selectors allow quick creation of guard tours that can cover an entire building or a single door check. Tours can be scheduled to repeat daily/weekly/monthly/yearly, end after a set number of occurrences, or stop on a specific date.

Start

9/4/2023 1600

End

9/4/2023 1630

Repeat

| Never | Hourly | Daily | Weekly | Monthly | Yearly |

Repeat every: 1 day(s)
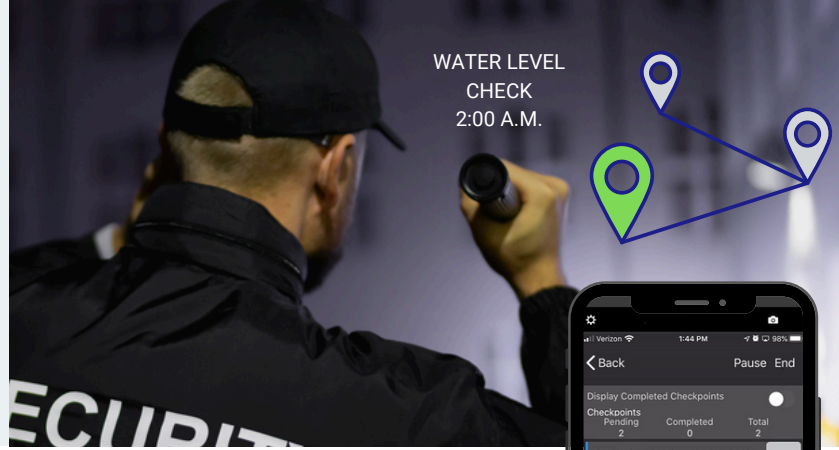

VERIFIED 3:43 AM

VERIFIED 3:47 AM

CHECK-IN BY 4:00 A.M.

CHECK-IN BY 4:20 A.M.

ASSIGN DYNAMIC CHECKLISTS TO CHECK POINTS

Easily create and assign a dynamic form or checklist of required activities to be performed and verified at each check point. Verification activities can include logging a response using radio buttons or a dropdown picklist, capturing and uploading digital media, or submitting an e-signature.

WATER LEVEL CHECK 2:00 A.M.

SCHEDULE SECURITY CHECKS
Pre-scheduled routines and routes saved in the system prompt officers using a mobile app to conduct required location-based security checks such as ensuring all keypads to doors in sensitive areas are working properly.

AUTOMATE PROOF-OF-PRESENCE
Live integration with check point technologies like barcodes, beacons, and NFC tags assist in automatically recording the time, date, and location of the officer at each assigned stop.

AUDIT DAILY ACCOUNTABILITY
Custom forms ensure officers complete important tasks while automated notifications alert supervisors to violations such as tours not starting on time, ending on time, or stopped before completion.
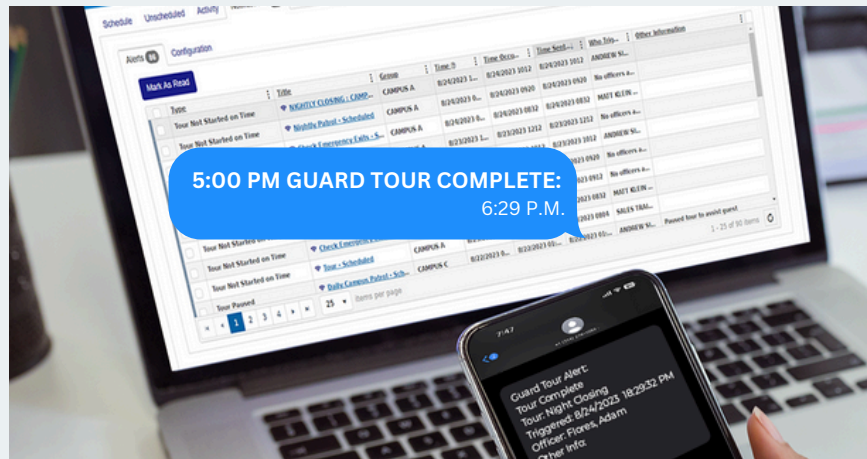

MOBILE APP
Officers use a mobile app to report incidents and upload digital evidence in areas with or without network connectivity.

SET SUPERVISOR NOTIFICATIONS AND ALERTS

Supervisors can receive automated notifications for exceptions such as tours not starting on time, ending on time, or stopping before completion. Notifications can be configured to be sent to single or multiple email addresses and mobile numbers or viewed in the guard tour system.

	TOUR IN PROGRESS	7/11/2023 07:14 AM	ANDREW SIMMONS
	CAMPUS A : NORTH WING	7/11/2023 07:14 AM	ANDREW SIMMONS
	ADD MEDIA	7/11/2023 07:15 AM	ANDREW SIMMONS
7	CAMPUS A : SOUTH WING	7/11/2023 07:15 AM	ANDREW SIMMONS
8	TOUR COMPLETE	7/11/2023 07:15 AM	ANDREW SIMMONS

LIMIT THE RISK OF LIABILITY

Limit risk of liability with the audit trail created for each tour. Flexible reporting allows you to include any activity performed by the officer during a tour, along with the date, time, and location verification captured by the system.
